Kossuth Lajos Gimnázium
Angol nyelvi besoroló teszt (2022. február 28.)
(A feladatlap 4 oldalas. Ne hagyj ki semmit! Good Luck!)

I. Írd be a helyes válasz betűjelét a mondatba! (8 pont)

Last month I lost my job and (1) _____ move. I found a new flat in the city centre (2) _____ smaller and cheaper (3) _____ the old one but much nicer. You see, the flat (4) _____ I had before was really big and I (5) _____ collect all sorts of rubbish. Of course, I threw away (6) _____ of it when I moved, even some big pieces of furniture. The problem is that I haven't actually settled (7) _____ my new flat yet because I need some new furniture. For example, I don't have a desk any longer and I (8) _____ buy one.

1. a. must b. had to c. should
2. a. who is b. which is c. which it is
3. a. from b. as c. than
4. a. who b. that c. where
5. a. used b. used to c. was using to
6. a. many b. more c. most
7. a. to b. at c. into
8. a. mustn't b. will have to c. won't have to

II. Írd be a helyes válasz betűjelét a mondatba! (9 pont)

I decided to take (1) _____ a new hobby (2) _____ I was studying at university. There were a lot of courses to choose from but I didn't know which one to take. (3) _____ I decided to (4) _____ a cooking class. I didn't know my way (5) _____ the kitchen at all before I started but after (6) _____ lessons I found that I was really good at it. Then I (7) _____ a big mistake. I invited some of my friends around for a dinner party. You see, they loved the food and they all asked me (8) _____ round their houses and cook for them. My new hobby was (9) _____ hard work in the end.

1. a. down b. in c. up
2. a. since b. while c. as soon as
3. a. Finally b. Probably c. Lately
4. a. make b. join c. book
5. a. about b. around c. into
6. a. a lot b. a little c. a few
7. a. took b. made c. did
8. a. I go b. to go c. going
9. a. less b. many c. a lot of

III. Olvasd el a szöveget a különböző sport találmányokról és válaszol a kérdésekre a bekezdés betűjével (A-E), amelyet a számok (1-9) elé kell írnod. Egy betű többször is használható. (18 pont)

Which sports invention(s):

- was inspired by a tribal custom? _____ (1)
- made the athlete look like a superhero? _____ (2)
- were developed by sportsmen? _____ (3) _____ (4) _____ (5)
- almost put the popularity of the sport at risk? _____ (6)
- was a combination of technique and innovation? _____ (7)
- drew strong criticism from an organisation? _____ (8)
- had an effect on the movement of the ball? _____ (9)

Never got passed the starting line ...

Innovative designers and sportsmen alike have come up with a variety of clever ways to gain an advantage over the competition; of course, officials wouldn't even give their ideas a sporting chance ...

A Jump to it

About fifty or so years ago, an athlete travelling through Africa noticed that members of the Watutsi tribe jumped very high up into the air during their ceremonies. How did they do it? By jumping off small piles of earth. The Russians decided to use this technique to help their athletes perform better in the high jump. So, they invented shoes that were almost two inches high at the toe and low at the heel. This, quite literally, worked wonders! In 1957, high jumper, Yuri Stepanov, set a new world record wearing these shoes, but after a number of complaints, it was decided that the record would not be accepted. The shoes were banned and it was decided that the maximum thickness of shoes should be 13 millimetres.

B Tennis, anyone?

In 1977, sports equipment designer, Werner Fischer, came up with the idea of tennis racquets with two sets of strings instead of one. His aim was to improve the speed of the ball and he succeeded beyond his wildest expectations. The revolutionary new racquet helped players produce powerful and accurate shots; in fact, it was almost guaranteed that the ball would go over the net just about every time. Of course, officials weren't pleased with this innovation and it was quickly banned.

C Bicycle built for one

British Olympic cyclist, Graeme Obree, came up with quite a clever way to improve his time. He changed the handlebars on his bike to suit his needs and cycled with his arms stretched out in front of him. His unusual technique was nicknamed the 'Superman-style'. Obree managed to improve his time, but the Union Cycliste Internationale quickly objected. A Union representative said that cyclists should win because of skill and ability, rather than because of the equipment they have and the design was banned.

D Wave goodbye to wood

Australian batsman, Dennis Lillee, caused a stir when he walked out onto the cricket field with an aluminium bat in a test match between England and Australia in 1979. Play was stopped for ten minutes while his captain attempted to persuade him to exchange the bat for one made of willow wood. Although it was not proven that an aluminium bat might offer an unfair advantage, the rules were quickly changed and now state that bats have to be made of wood.

E On the table

If you're familiar with the game of table tennis, you'll know that table tennis bats are covered in a special kind of rubber. Several years ago, Austrian table tennis champion, Toni Hold, decided to try a little experiment and heated the rubber. This changed the texture of the rubber and, consequently, the nature of the game. The ball spun all over the place and, more often than not, in the direction opposite to the one expected. Obviously, this made it very difficult to play and there were many complaints that the game was becoming boring to watch. This invention, too, was banned.

IV. Fogalmazás (15 pont)

Írj egy kb. 80-100 szavas levelet a megadott szempontok alapján! Képzeld el, hogy most kapsz egy levelet barátodtól, Sam-től. Itt látod levelének részletét.

Válaszolj rá mindent kérdést megválaszolva és fogadd el a meghívását.

What are you doing next weekend? Well, I've got an idea. My uncle has a house in a village next to a beautiful lake just a few kilometres from your home town. He said we could go and stay there for a couple of days. I can't remember the name but I'm sure you know the one I'm talking about. What do you think? You've been there before, haven't you? What is it like? The only problem is how we are going to get there. You see I don't want to borrow my dad's car because yesterday we argued about what I'm going to do next year. He wants me to go to uni but I prefer to find a part-time job somewhere in Europe for a year before I start my studies. Don't you think that is a good idea?

Dear Sam,

[illegible]
